Hi All,

Today a wedding videographer lost his video drone on one of our balconies as he was shooting for a wedding at the Four Seasons.

Due to a magnetic interference he lost control of the video drone. If everyone doesn't mind just checking their balconies to see if it might be there that would be great. As you can imagine there was wedding footage that he needs to recover for his clients.

Feel free to give the office a call if you find it or have any additional questions!

Kind regards,

Your Bozzuto Management Staff
