

3. Mixing Elbow

3-1 Construction

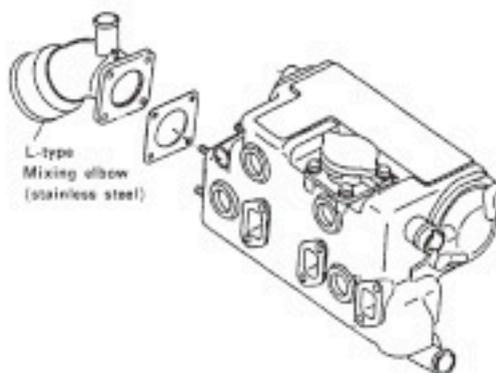

There are two types of mixing elbows for the 3JH3E engine: the L and U types. Both types are bolted to the exhaust manifold.

There are also L and U types for the 3JH-TE, engine. Both are mounted on the turbocharger discharge.

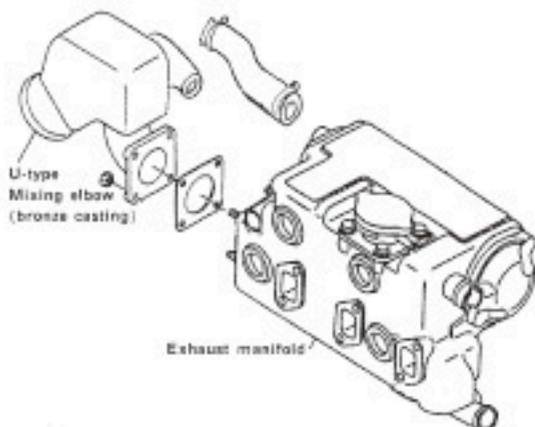

3-2 Mixing elbow inspection

- (1) Clean dirt and scale out of the air and cooling water lines.
- (2) Repair cracks or damage to welds, or replace.
- (3) Inspect the gasket packing and replace as necessary.

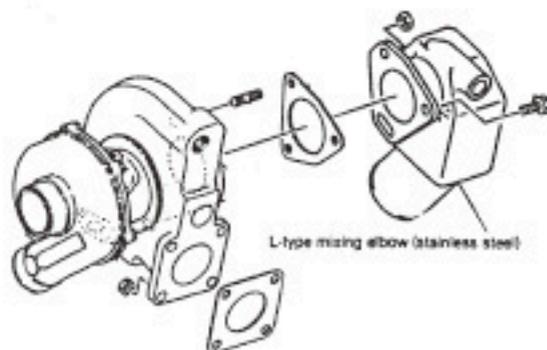

For model 3JH2E

(Option)

For models 3JH2-TE

(Option)
