RL70HSB Display Hidden Menu

Per Mark at RayMarine, 12/06/2002:

To access the hidden diagnostic menus:

Press **Menu**, **Radar Setup**, push and hold **Enter**
Select from the 4 softkeys:

Built-InTest

See next page for typical data

Seatalk Data

This produces two columns of data for Received Data and Transmitted Data. It is hex data and will vary. The data can be paused by pressing the active softkey.

NMEA Data

This produces two columns of data for Received Data and Transmitted Data. It is hex data and will vary. The data can be paused by pressing the active softkey.

EOL Test

This test produces vertical lines on the screen to test for display driver and LCD display problems.
