BOAT INFORMATION *example*

BOAT MODEL / YEAR*		
HULL NO.		
MM/YY OF PURCHASE		
MAST SERIAL NO.*		

*** Required Information**

The mast serial number is located at the bottom of the mast extrusion where it meets the heel plug. (See Drawing) The final five digits are the best identification sequence if the number is difficult to read.

- 1. Please note the inspection area of the mast on the drawing. It is located from the bottom of the boom gooseneck to the bottom of the mainsail furling drive unit. In surveying this area do you notice any deformity in the mast extrusion on either the port or starboard side?**
- 2. If extrusion deformation is noticed anywhere in the inspection area, please describe. (Size, markings, bulge or dimple)**
- 3. If extrusion deformation is noticed, please measure to an approximate center point using the reference points on the drawing as zero.
Vertical measurement – from bottom of extrusion
Horizontal measurement – edge of sail slot (*ex.*) port edge for port side.
Record Measurements:**
