

IV) DECK

- The safe lines can be fastened either on the mooring cleats or on the toe rail.

Some boats are fitted with a foldaway swimming ladder. The swimming ladder shall be in its usual place on the transom as soon as you are on board.

Make sure that the hatches and portholes are closed before you put out to sea.

In case of rough sea, close the boat with her door and washboard so that no water may come into the boat

Check that nothing blocks up the draining holes ; never seal them.
